ignition coil

Air cooled
3,6 h. p. motor
with high torque,
three-speed gear

Alterations of
design and construction
are reserved without notice!

SIMSON Mokick

IFA mobile-DDR

S50 B1

This double-seat minicycle represents a top-class product considering its technical characteristics, its degree of equipment as well as its modern sporting style.

The magic formula of progress - developed for you

The air cooled 3,6 h. p. motor with its three-speed gear gives the vehicle a maximum speed of 60 km/h, even when carrying a pillionrider.

The telescope fork of max. 130 mm spring motion and with hydraulically cushioned limit stop as well as the rear wheel suspension of 85 mm spring motion of hydraulically damped shock absorbers offers a driving comfort unknown till now with this class of motorvehicles. Moreover, noiseless running will meet all national and international demands for environment protection for a certainty.

The motorbike is furnished with a luxurious electric system, consisting of a headlamp 25/25 W, stop light 21 W, rear light 5 W, 4 flashing-light direction indicators, a lead storage battery 12 Ah with charging equipment, d. c. signal horn, by-pass light signal and parking light. The ignition device features an outside placed ignition coil. Stationary foot-rests for pillion-rider afford highest riding comfort for the passengers.

As regards finish, lacquering in various brilliant colours as well as chromium-plated and polished components will meet all pretentious demands.
